Rates are subject to other terms, conditions and are subject to change without notice. The APR is calculated on an \$80,000 loan amount with down payment of 20%, applicable loan origination fee, discount points and no prepaid interest collected. APR's for individual loans may vary. A down payment of less than 20% could require private mortgage insurance, which could increase the Annual Percentage Rate (APR). For adjustable-rate mortgages, rates are subject to increase after the initial fixed-rate period. A 30-year loan term applies to adjustable-rate mortgages. Scheduled payments shown above do not include any items other than principal and interest.
